Diamond Air Con Chemical  
Cleaning & Refresh

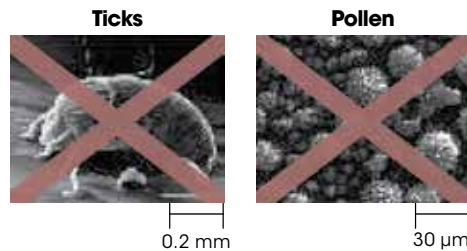

Harmful and undesirable particles (such as dust, ticks, pollen, and bacteria) from outside may enter your vehicle through the air conditioning system. It is the job of the air con filter to keep air in your vehicle clean. Thus, it is important that the air con filter is genuine to ensure the highest quality and performance. Through extensive and vigorous tests, the effectiveness of genuine air con filters was compared against counterfeit ones.

#### Advantages of using Mitsubishi genuine air con filters

It filters and deodorises polluted air including ticks and pollen. Mitsubishi genuine air con filters comply with our strict standards that demand a superior level of performance, safety and reliability, and best fit for your vehicle.

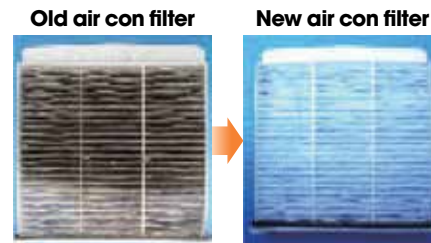

#### How do I get a more comfortable interior?

Over time, your air con filter will get dirty and its filtering and deodorising capabilities will gradually decline. To keep your vehicle in good condition, we highly recommend periodic replacement of the Mitsubishi genuine air con filter at 6-month or 10,000 km (whichever comes first) intervals.

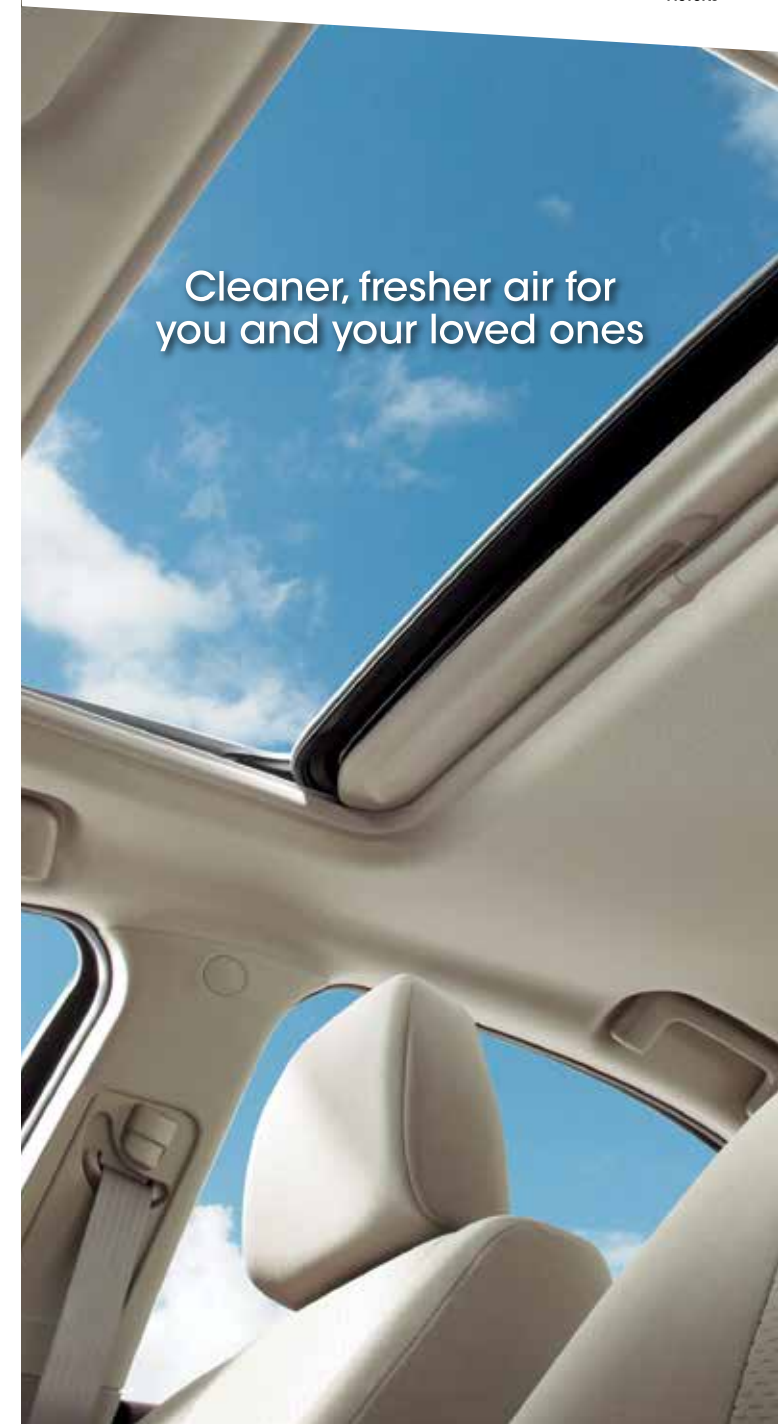

#### Dust Filtering Rate

Over time, you may notice reduced airflow from your vehicle's air conditioning vents. Dust Filtering Rate tests prove that genuine air con filters result in stronger, improved airflow from the air conditioning vents as compared to counterfeit filters. This is because genuine air con filters do not get clogged as easily as counterfeit ones.

#### Dust Filtering Test

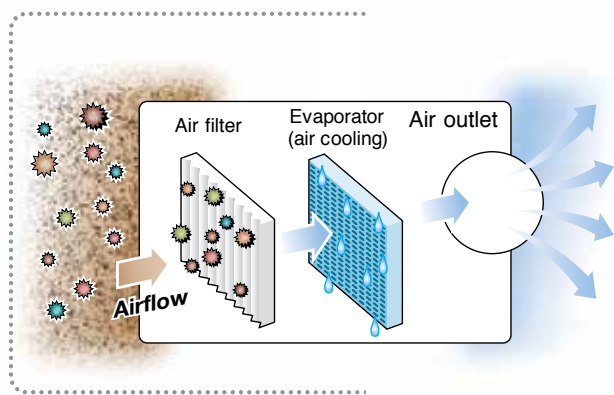

The genuine air con filter outperforms counterfeit versions in the Dust Filtering Test, trapping particles from the exterior of the vehicle more effectively.

Cleaner, fresher air for  
you and your loved ones

## Benefits Of Caring For Your Air Conditioner

### The importance of servicing your air conditioning system

Your vehicle's air conditioning system consists of both the air con filter and evaporator. The air con filter blocks undesirable particles such as dust from entering your vehicle through the air conditioning system. However, it takes more than just a clean air con filter to keep the air in your vehicle fresh as sources of unclean air may actually come from within your vehicle.

An example is the evaporator located inside your vehicle's air conditioning system that cools the air passing through it. The evaporator's high humidity level makes it an easy and ideal breeding ground for bacteria and fungi. These bacteria and fungi are causes of not only bad smells, but also asthma and infections.

Therefore, apart from replacing the air con filter at recommended intervals, it is also important to periodically clean the evaporator to prevent bacteria and fungi from growing, keeping the occupants in your vehicle healthy.

### How often should you service your air conditioning system?

It is recommended to replace the air con filter every 6 months and clean the evaporator every 12 months for your health and comfort. Servicing the air conditioning system regularly ensures circulation of cool, clean and fresh air in the vehicle. This not only prevents bad smells and diminished cooling efficiency, but is also a long-term investment to keep you and your passengers healthy.

## Why Choose Diamond Air Con Chemical Cleaning & Refresh

### Diamond Air Con Chemical Cleaning & Refresh

- Eliminates bacteria, fungi, algae and microorganisms
- Includes application of evaporator cleaner
- Optimises performance of cooling system
- Provides long-term deodorisation
- Purifies air stream from evaporator coil
- Removes unpleasant odours
- Sanitises air conditioning unit
- Unclogs fin passages

The air conditioning system is disinfected and unpleasant odours are removed with the use of a cleaning technology that eliminates bacteria, spots and mould to provide fresh and clean air inside the vehicle.

### Mitsubishi Antibacterial Cabin Refresh

Antibacterial Cabin Refresh cleans and disinfects the cabin, removing any unpleasant odours. Bacteria, spores, mould and microorganisms are eliminated and prevented from regenerating for a period of time. It deodorises upholstery as well as carpets and refreshes the entire vehicle.

To keep your vehicle in optimal condition, it is recommended to refresh both the air conditioning system as well as the passenger cabin on a regular basis.

### Available For All Mitsubishi Models

#### Prices:

Option 1: **\$62** (with cleaning of air con evaporator coil and servicing of air con filter)

Option 2: **\$99** (with cleaning of air con evaporator coil and replacement of air con filter)

Option 3: **\$36** (antibacterial cabin refresh)  
Top up **only \$18** for Option 3 when you purchase Option 1 or 2.

Prices are inclusive of GST and subject to changes without prior notice.

Our service also uses Mitsubishi genuine parts to prolong the lifespan of your cooling system. Mitsubishi genuine parts are developed based on years of research and development, and have undergone extensive and vigorous tests to ensure the perfect fit and longevity for your vehicle.

All Mitsubishi genuine parts come with a 6-month or 10,000 km (whichever comes first) warranty, unlike non-genuine parts.
