

Nano Headlamp Restoration

For a brighter, clearer drive.

Like your vehicle, the headlamps too age over time. Headlamp lenses become yellow, blurred and dull due to oxidisation, affecting the lamp's brightness. This causes dimness and poor vision, the main cause of accidents!

Renew your vehicle's headlamps to their original pristine condition with our innovative Nano Headlamp Restoration Service! Using a fine polishing paste from Germany, this service achieves a long-lasting deep high gloss shine.

HOW IT WORKS

One of the most advanced headlamp treatments, Nano Headlamp Restoration uses nanotechnology specially formulated for all plastic or acrylic headlamps, tail lamps and signal flashers.

Before

After

STEP 1: CLEAN AND GRIND

The headlamps are cleaned thoroughly before the Nano finisher is applied evenly over the lens. The restoration process begins with the use of sandpaper to remove all visible discolouration and scratches.

STEP 2: POLISH

The headlamps are polished with a pre-polishing paste. Then the Nano finisher is sprayed onto the applied polish. This process is repeated until the headlamps are clear, smooth and transparent.

STEP 3: SEALANT

At the final stage, a Nano sealant is applied evenly over the restored headlamp's surface for added protection that lasts.

At \$99 (incl. GST), U.P. \$198, Nano Headlamp Restoration can:

- Improve headlight performance
- Increase night-vision illumination
- Remove the need to replace headlamps which can cost thousands of dollars
- Enhance your vehicle's appearance

Mitsubishi Grooming Services

Mitsubishi Grooming Services

How your car looks says a lot about you. A car not only makes you look good, it also gives you reason to be proud. In the long run, a well-maintained car also has a higher resale value.
