

Nano Headlamp Restoration

For a brighter, clearer drive.

Headlamp lenses may become yellow, blurred and dull due to oxidation. This will cause your headlamps to be dim, increasing the risk of accidents due to poor vision.

Restore your vehicle headlamps to their original pristine condition with our innovative Nano Headlamp Restoration Service! Using a fine polishing paste from Germany, this service achieves a long-lasting deep high gloss shine.

HOW IT WORKS

Using the most advanced nanotechnology and specially formulated polishing paste from Germany, this service gives your headlamps a long-lasting and high gloss shine finishing. Suitable for all plastic or acrylic headlamps, tail lamps and signal flashers.

Before

After

STEP 1: CLEAN AND GRIND

Restoration process begins with the cleaning of each headlamp lens. Sandpaper is also used to remove all visible discolouration and scratches.

STEP 2: POLISH

Nano finisher is applied evenly over each lens after polishing with a pre-polishing paste. This process is repeated until the headlamps are clear, smooth and transparent.

STEP 3: SEALANT

Finally, a Nano sealant is applied evenly over the restored headlamp's surface for added protection that lasts.

Nano Headlamp Restoration at \$99 (U.P. \$198):

- Improve headlight illumination
- Huge cost-savings compared to replacing a new set of headlamps
- Enhance vehicle appearance

Mitsubishi Grooming Services
