

## Benefits

- Easy maintenance
- Efficient guard against harsh environmental conditions
- Extremely thin (0.5 micron), durable and hard-wearing see-through layer
- Hydrophobic layer
- Prevents oxidation of paintwork and improves chemical and mechanical resistance
- Protects original showroom shine and enhances the paint's colour brilliance
- Short application time

## Price

Car Size	Car Models	Total Paint Protection	Wheel Protection

# TOTAL PAINT & WHEEL PROTECTION

Exceptional Journeys

## INTRODUCTION

Originally developed for the luxury yacht market as a specialist paint-polymer protection product, Zertona™ has been successfully tested, trialled and used by worldwide OEM manufacturers and distributors. Customers include companies at the forefront of the automotive, marine and aviation industries. It is developed in the USA and Europe, and manufactured in the UK.

## Total Paint Protection

Zertona™ provides long lasting hydrophobic coating for paint, plastic trims and headlamps. Its sealant forms a tough, durable, water beading ceramic barrier to paintwork, as well as to plastics. This increases the depth of gloss of your vehicle and enhances the paint's colour brilliance, while protecting the paint and plastic surfaces against acid rain and atmospheric pollutants. The perfect solution for busy executives, all that is needed after your vehicle is coated is a regular hand wash and dry to return to its original showroom shine.

## Wheel Protection

Bare alloy or lacquered rims can quickly become stained with brown brake dust. This dust may be hot and can bake itself into the rim, leaving a brown, corrosion-like stain. Zertona™ is designed to reduce this, and assists with easy cleaning of the wheels. With ambient cured, low surface energy coating, it reduces hot brake dust from sticking onto the rims and provides a permanent and corrosion-resistant finish for alloys. Cleaning is also incredibly simple – dirt falls off with a jet wash.

## Frequency

Your vehicle's paint is made up of soft compounds that are vulnerable to physical and chemical wear and tear. To keep your vehicle in pristine condition and avoid spending extra on re-polishing or correcting your vehicle's paintwork, we recommend that you bring your vehicle in once a year for the total paint protection service.

# Revolutionary Protection Against Pollutants And Harsh Environments

## Headlamps

- Creates a water beading surface for easy cleaning and maintenance
- Eliminates hazing in the clear plastic lenses of headlamps
- Remains clear for full driving visibility at night

## Body

Using a high tech sealant, your vehicle is safely protected through a tough, durable, water beading ceramic barrier to paintwork and plastics from these atmospheric pollutants:

- Acid Rain
- Bird Lime
- Exhaust Fumes
- Oils
- Salts
- UV Rays

## Wheel

A layer of liquid ceramic coating is applied, effectively protecting your wheels from harmful elements, assisting in easy cleaning of the wheels and reducing the following:

- Contamination from general road grime
- Eliminates chemical attack from cleaning fluids that degrade the surface
- Hot brake dust pitting the surface
- Oil stains
- Road tar from sticking
